

## LONG YEARS AGO

October 16, 1903

Threshing is the order of the day.

R.B. Bennett M.L.A. donated \$10 to the Agricultural Society.

Sylvester Culver of Lousburg, Kan., has purchased the barber shop from V. Fisher.

Dr. Lackner gives a guarantee with every lot sold on the Lackner estate that a three plank sidewalk will be built next spring from town to Lackner ave. in east Didsbury.

Plans and specifications are completed for an up-to-date skating rink 80 x 150 feet, with an addition of two sheets of curling ice.

A prairie fire swept the country east of Didsbury last week, but the 30 men fighting the blaze finally got it under control.

## MAY ORGANIZE BROWNIES

Plans are being made to organize a Brownie Group of the Girl Guides for girls ages 8 to 11.

Mothers who are desirous of having their daughters join the group kindly leave their names with Miss Joyce Morgan at the post office. Should sufficient interest warrant such a group being formed, notice will be given in the local paper at a later date.

VOLUME 42, NUMBER 42

DIDSBURY, ALBERTA, THURSDAY, OCTOBER 16, 1946

\$2.00 A YEAR; 5c A COPY

DIDSBURY'S QUOTA  
FOR NINTH LOAN  
SET AT \$123,000Unit Headquarters Again  
At C. E. Reiber's Office

According to word received by C. E. Reiber, Unit Organizer for this district, the quota for Didsbury and district in the coming Ninth Victory Loan has been set by provincial headquarters at \$123,000.

This is by far the largest quota set since the Victory Loans were issued, but local War Finance Committee officials are confident that the quota can be reached.

The quota for this district in the Eighth Victory Loan was \$100,000, but when all returns were tabulated it was revealed that the quota had been exceeded by \$15,000.

Members of the Local War Finance Committee are: C. E. Reiber, Unit Organizer; H. Morgan, President; Abe Snyder, Vice-President; George Law, Public Relations Adviser.

Official canvassers are: E. Cogswell, Geo. A. Youngs, and W. W. Gillrie.

The Ninth Victory Loan opens on Monday, October 22nd, and you are urged to prepare now to buy all the bonds you can afford. If the victory loan salesman does not call you are urged to go to the unit headquarters in C. E. Reiber's office, or to the local branch of the Royal Bank of Canada, and make your application.

Installment buyers are reminded that there will be no other loans for at least 12 months, but that they can purchase bonds on the installment plan over a twelve-month period. The interest is still three per cent and the investment is the

## REBECCA ACTIVITIES

On Friday, Sept. 28th the Rebecas held a shower at the home of Mr. and Mrs. E. Cogswell in honor of Mr. and Mrs. Cecil Brown who were recently married and will soon take up residence in this community.

The couple received many useful gifts.

The meeting which was to have been on Sept. 26th was postponed due to bad roads and was held on October 3rd when thirteen ladies met at the home of Betty Broadhurst. During the afternoon several boxes of clothing were packed for the National Clothing Drive. A variety of clothing was very generously donated by all.

With the expectations that the next few weeks will be very busy no date was set for the next meeting.

Lunch was served and the meeting adjourned.

HERBERTUS PETER KIEVIT  
PASSES IN 66TH YEAR

Herbertus Peter Kievit, 66 died at Didsbury on Saturday, October 13th.

Born in Texel, Holland, Mr. Kievit came to Canada in May, 1912, living first at De Winton, and then at Nanton and Delta, before coming to Didsbury about five years ago.

Surviving are his widow, Katherine; three sons, Arrie of Lacombe, Sylvan of Delta, and Ronald at home; one daughter, Mrs. J. M. Verkuil of Madden; and five grand children.

Funeral services were held from Knox United Church, Didsbury, on Tuesday, October 16th, at 2 p.m. with the Rev. D. Whyte Smith officiating. Pallbearers were: Russel Gillrie, Harvey Gillrie, Geo. Rankin, Herman Larson, Mr. Ballas and P. Radford.

Interment followed in the Didsbury cemetery with Didsbury Funeral Home in charge of arrangements.

## BURNSIDE NEWS NOTES

Mrs. Woods and Kenneth escaped a serious accident while coming into Didsbury last week over the Rosebud hill. The steering rod of the car became uncoupled, but fortunately the vehicle was brought to a stop without an accident.

LAC Brian Page arrived home on Saturday, discharged from the R.C.A.F. and intends to take a course at the technical school in Calgary this winter.

We notice that Sgt. Wm. McCulloch is back. He left Didsbury six years ago as a Gunner, dressed in peak cap and bandolier, and while he never went overseas due to a major operation and poor health, he stayed with the forces and was promoted to the rank of Sergeant. He returned with his bride, who was also in the forces for two and a half years, and they have taken up temporary residence with his father, Mr. Wm. McCulloch of the McCulloch Apartments in Didsbury. Bill is a Jutland born boy and attended Burnside school. Welcome home, Sgt. and Mrs. McCulloch.

Lloyd Cipperey and fiancée were busy shopping in Didsbury Saturday evening. Lloyd reports that his mother is still in good health, and although blind would be glad to have all old friends visit her, as she still recognizes them by their voice.

We noticed in a recent issue of this paper that Sgt. Major Geo. Miller was reported as a Jutland boy, but George says he is very much a Burnside boy, so welcome home to the Burnside district, George.

The harvesting in our district is just about over and crops were light. Gardens were practically a hopeless failure, with potatoes as small as walnuts in many cases. However, we notice that our farmer friends to the west have a good crop of potatoes, so we are not worrying.

NOTE—There were a few items added to the Burnside news last week which were not sent to us by our regular correspondent, and she does not lay claim to their origin.

safest in the world today.

Although the war is over money is still needed to bring back our boys and girls from overseas, to pay gratuities and back wages, and to establish our returned men and women in civil life.

Buying bonds is very little to ask of local citizens who have remained at home and in most cases prospered, while our boys went overseas to fight our battles, and many of them never returned.

Can we let these men and women down now? Let us buy all the Victory Bonds we can in the Ninth Victory Loan.

COLLECTION COMMITTEE  
FOR USED CLOTHING HAS  
GOOD RESULTS IN CANVASWish to Thank All Who  
Helped or Donated

The local collection committee of the National Clothing Collection campaign, report wonderful results from their drive in town last Saturday, when trucks were sent around to gather used clothing from the various houses.

About two tons of used clothing have been collected in Didsbury and district to date and this was shipped out to provincial headquarters the first of the week.

Anyone who has used clothing to donate to this worthy cause should bring it to the local collection depot at the Rosebud Hotel. The depot will be open Thursday, Friday and Saturday this week from 3 to 5 o'clock.

The local committee wish to thank all those who contributed clothing to the drive, and those who helped in its collection and packing.

## NOTES FROM THE EAST

Mrs. Harold Shells returned to Hanna where she will receive chiropractic treatment.

Ernie Atkinson has been successful enough to strike a good flow of water, and says he now has a good well.

We are sorry to hear young Bobby Bitner had the misfortune to fall from a bicycle and hurt his eye, but specialists in Calgary say it will clear up in time. It is wonderful the falls these youngsters get and seem to recover without serious injury.

## JENKINS—SHEPPARD

At a quiet ceremony in Lewis Memorial United church, Turner Valley, on Wednesday afternoon, Oct. 3, Patricia Margaret, daughter of Mr. Charles Sheppard, became the bride of Mr. William E. Jenkins, son of Mr. and Mrs. Arthur Jenkins of Didsbury. Rev. O. H. Rolis officiated at the service, being a bouquet of dark roses and cream colored gladioli completed her ensemble.

Miss Alice Sheppard was her sister's only attendant. She looked lovely in a pale blue satin floor-length dress and carried a bouquet of roses.

Flight Sergeant Lloyd Jenkins was best man, coming from Moncton, N.B. for the wedding.

Mr. Jack Bryant played the wedding music and during the signing of the register, Miss White of Turner Valley sang "I'll Walk Beside You".

A reception was held at the home of the bride's father where the bride's great aunt, Mrs. George Barrs, and Mrs. A. Jenkins presided at the tea table. Mr. Rolis gave the bridal toast.

The table was very beautifully decorated and centred with a three-tier wedding cake.

Mr. and Mrs. Jenkins left for a short wedding trip and on their return will reside at Turner Valley. For travelling the bride wore a cerise hat and casual coat over a frock of teal blue.

LOCAL LIONS CLUB SUPPLIES  
FACTS ON POWER RATES

In this issue the Didsbury Lions Club has a display advertisement outlining the advantages of the new rate and power rates proposed for Didsbury. The cost of electricity under the new proposed rate is very advantageous to the majority of consumers of electricity in Didsbury, and if you want to be among those who benefit by lower rates you are asked to make sure your name is on the petition now being circulated by members of the Lions Club.

ANOTHER ENTERTAINMENT  
FOR SERVICE PERSONNEL

The entertainment committee of the Didsbury Citizens' Rehabilitation Committee plans another entertainment for the returned men and women, and this will be held in the Lions Hall on Friday evening, October 19th, commencing at 8:00 p.m.

A general invitation is extended to all men and women who have returned or who have served in the forces, and their gentleman or lady friend.

Military whist will occupy the first part of the evening's program and it is to be hoped that a good turnout of returned men and women will be present, and arrive on time.

## FALLEN TIMBER NOTES

Friends of R.E. McMullen are pleased to hear that he is improving from his recent illness.

Rev. Mrs. C.B. Moore held her usual twice a month service in the Fallen Timber school house on Sunday afternoon last.

The municipal cat has been out over that part of the Burma Road that lays in the municipality and has done good work. But please come again.

Reports say that the Burma road extension in the Local Improvement District is to be gravelled soon.

Some of the young people of the district went to Sundre to see the pictures Saturday evening. "The Plainman" was on the board. The visitors were Alex Moore and family, Mrs. Alex McKenzie, and Mr. and Mrs. J. Howton.

Mrs. P.J. Fair had as a visitor over the week end, Miss Myrtle Bonham, who is a petty officer in the navy.

Mrs. Joe McGaffin is visiting her sister-in-law, Mrs. Bob McGaffin, in Didsbury.

Miss Agnes Reimer who is attending High School in Didsbury, spent the week end with her parents, Mr. and Mrs. Henry Reimer.

Ray Teynor is still making weekly pilgrimages to the Carstairs district.

Picking cranberries is now interesting the ladies of the district. Glen Cooper and Harry McGaffin, students at Carleton Place, Ontario, were home for the week end.

Roy Montgomery is home on harvest leave.

## HARMATTAN NEWS NOTES

Albert Gilmore of Harmattan was in Didsbury Saturday visiting the dentist.

Jean Conrad of the United States Air Force, is home on leave.

Scotty McDonald is threshing on the Howard Gilmore out east of Didsbury.

## DIDSBURY HOSPITAL BIRTHS

Born to Mr. and Mrs. Edward Hintz on Sunday, October 7, a girl. To Mr. and Mrs. Alvin Konschick on Wednesday, October 10, a girl.

To Mr. and Mrs. Arthur Goodwin on Sunday, October 14, a girl.

DIDSBURY & DISTRICT  
NOW OWN \$814,200  
IN VICTORY BONDSAnnual Interest Being  
Paid is \$24,426.00

According to figures released by the Provincial War Finance Committee the citizens of Didsbury and district have purchased \$814,200 worth of Victory Bonds in the eight Victory Loans which have been offered in the past four years. This is a tidy sum and those who have purchased these bonds will be able to carry on during post-war years with a feeling of security.

The interest being paid on these bonds amounts to \$24,426 annually and is providing a cash revenue to holders, which they have to spend without drawing on their original investment.

You, too, can share in the security of your friends and neighbor by investing in Victory Bonds when the Ninth Loan opens on Monday, October 22nd.

KEN CASSIDY'S NEW BUILDING  
RAPIDLY TAKING SHAPE

The new building now being constructed on the Cassidy Lumber Yard property is being rushed this fine weather and it is expected that construction will be completed by the middle of November. The new building will be 48x66 feet and is to be used for a work shop, lumber and John Deere machine business.

The Pick of Tobacco

## Radar

SCIENTIFIC PROGRESS was swift during the war, and there were many phenomenal developments in that field. Some of them will prove to be of value only for purposes of war, but others will have important peacetime uses. One of those is radiolocation, better known to the public as "radar." One of the most closely guarded secrets of the war, radar is generally believed to have contributed more than any other scientific factor to the Allied victory. The British Ministry of Information has recently published an interesting pamphlet on the history of this device, which it described as "the most novel and versatile weapon of the century of offense, and it is predicted that it will be 'as valuable in peace as it has been revolutionary in war.'"

## Had Many Uses In War At Sea

Radar played a large part in the success of the decisive Battle of Britain. In this connection, Air Chief Marshal Sir Arthur Tedder has stated: "If radar had not prevented the Germans from obtaining the element of surprise in the raids on England, I hate to think of where we might have been." Early in the war it was used for the location of enemy planes in the skies over, and approaching England, but later radar was made available for many other purposes. In naval warfare it was used to make possible the bombing of ships at sea, regardless of fog conditions. It was also used to perfect the "blind fire" technique in naval gunnery, and it proved invaluable in the detection of enemy ships, submarines and "planes at sea." Many lives were saved by the use of radar in "air-sea rescue" operation and on "D" Day it was a highly important factor in the success of that great amphibious operation.

## Tribute Paid To Canadians

In the closing months of the war in Europe, radar was used to overcome the effectiveness of the first flying bomb, and it was about to be successfully employed against the V-2 weapon, when Germany's collapse ended that menace. Now that it is no longer required for war, radar will still be used for many purposes. It will remove many of the hazards of air and sea travel during foggy weather, and it is believed that it may be put to use on motor highways to cut down the number of traffic accidents. Radiolocation was discovered and developed by British scientists, but credit is given by them to Canada's part in its success. In the manufacture of radar equipment and the training of highly specialized technicians, many thousands of whom served in Britain, Canada has made an important and valuable contribution to this great scientific development.

## The Kindly Way

Abraham Lincoln Convinced Man He Was Unfit For Job

Abraham Lincoln once found it necessary to refuse the efforts of a certain entirely unworthy and incompetent application for the post of doorkeeper of the House of Representatives. But the President refused him gently and whimsically, without hurting his feelings, in this manner: "So you want to be doorkeeper of the House, eh?" "Yes, Mr. President." "Well, have you ever been a doorkeeper? Have you ever had any experience in doorkeeping?" "Well, no actual experience, sir." "Any theoretical experience? Any instructions in the duties and ethics of doorkeeping?" "No sir." "Have you read any text on the subject?" "No." "Have you ever conversed with anyone who has read such a book?" "No sir, I'm afraid not, sir." "Well, then, my friend, don't you see that you haven't a single qualification for this important post?" said Lincoln, in a reproachful tone. "Yes, I do," said the applicant, and he took leave humbly, almost gratefully.

## Wonder Drug

British Doctors Cure Many Ills With Penicillin

The Manchester Guardian, England, reports another remarkable success in the use of penicillin, this time as a cure for influenza meningitis. In the United Kingdom doctors have already successfully used the British "Wonder Drug" to cure a large number of cases of typhoid fever and pneumonia, and to treat gonorrhea and diphtheria. The germ of influenza meningitis, however, was hitherto regarded as resistant to penicillin. Nevertheless after Manchester doctors had used it on a child suffering from this illness he responded almost immediately, ultimately making a complete recovery.

## Value Of Friendship

By Georgia Harriman Owen In The New York Herald-Tribune

Let us recall the ingenuity of Lord Cromer, at the time of our war with Spain, in restricting the Spanish fleet on its way to Manila, through the Suez Canal, with just enough coal to enable it to reach Barcelona. England interpreted Spain's plans. Again, when Dewey was in occupation of Manila Bay and the Kaiser showed his hand by sending over Admiral von Diederich, England again stepped in. Such acts as these proved England's friendship for us in the hour of need. Henry Wickham Stead, in his review, "Through Thirty Years", of events that preceded the World War, gives some interesting facts not generally known. He reveals that there was a movement in 1915 on the part of certain European powers "to bring the whole of Europe solidly in line against the United States." What could we have done with our inadequate equipped army and navy against such overpowering forces? It would have meant overwhelming defeat for us had not Great Britain intervened and frustrated their plans. There might not have been any "Star-Spangled Banner" waving proudly over our land today!

## Mineralized Waters

Royal Commission To Study Development Of Waters Of Lake In Saskatchewan

The medical benefits and commercial possibilities of the development of the mineralized waters of Little Manitou Lake, near Watrous, Sask., have been made the study for a royal commission by the Saskatchewan Government. Four will make up the commission: J. G. Rempel, University of Saskatchewan scientist; W. A. Rid, provincial laboratory director; Dr. B. Brachman, Regina, and Dr. W. P. John, Vancouver. Little Manitou Lake waters have been noted for their buoyancy and for reported health-giving qualities in rheumatic and skin diseases. Mineral salts extracted from the lake's waters have been used commercially through drug stores. More than 10 years ago a company began exploitation of the great mineral bed under the lake waters, but development halted because of financial troubles. —Financial Post.

The only exception to the law requiring signing one's name in official documents in England is the royal family, who sign only their baptismal names. 2610

## Price Control And Rationing Information

Q.—We are being asked to keep the labels and sales slips on all merchandise we buy in case we have reason to complain about high price or poor quality. How do I go about registering a complaint?

A.—First you should do what you have always done—discuss any unsatisfactory merchandise with your retailer. If he feels it is in order, he will make an adjustment for you and take the matter up with his supplier. If, however, the retailer or his customer do not feel they are satisfied with the results of this discussion, they can give the facts to the local office of the Wartime Prices and Trade Board for further check.

Q.—I have to have special meat in my diet. Can I get more meat coupons for this purpose?

A.—Yes, however you must have a doctor's or hospital's certificate which must state on it the amount of meat you will require for your special diet. This should be sent or taken to the nearest ration branch office.

Q.—Our church group wants to make over some adult clothing into children's clothing to be sent to the UNRRA clothing drive. Could you tell us where we could get tips on how to make over cast-off clothes?

A.—"Remake Wrinkles" is a booklet which will give you many valuable suggestions in the making over of clothing. You may obtain this guide book if you write to the Consumer Branch, Wartime Prices and Trade Board, in your province.

Q.—Some friends tell me I can get dairy butter without any coupons. Is this correct?

A.—No. Dairy butter is rationed the same as creamery butter. One coupon entitles you to half a pound of butter.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

## Good Property To Have

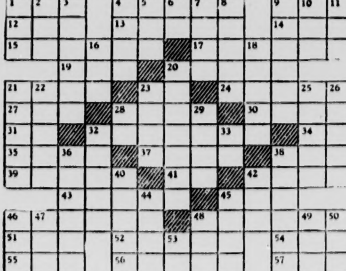

Large Numbers Of People In Eastern Markets

Quite a few English farms are being bought just now and at very low prices. There is evidently a pretty general idea in Britain that land is good property to have, and no sooner is a good farm put on the market than it is very quickly purchased. Land as a property investment has so demonstrated its vital necessity that a great many people have now a new desire to own land.

The use of liver to cure night blindness was mentioned in manuscripts written before the Christian era.

## IN CANADIAN FORCES

Total Of 13,411 From United States Enlisted In Canada

A total of 13,411 men and women came from the United States to enlist with Canadian forces—more than 60 per cent. of them with the R.C.A.P.—in the second Great War, a comparison by the three services showed.

The figure represents those who, on enlistment, gave the United States as their permanent residence. Many of them may have been Canadian-born, but services officials are prone to cancel that off against the numbers of American-born men and women who left homes in Canada to serve.

Of the total, 8,885 enlisted or were commissioned with the R.C.A.P., including 129 who served with the women's division. Up to the end of July, 1945, 3,750 men and five women had been discharged from the R.C.A.P. to join the U.S. forces.

The army enlisted 4,740 American residents, including 347 C.W.A.C.s. There is no exact record of how many of them transferred to the U.S. forces at the time of Pearl Harbor or thereafter.

The nearest figure is that of 1,160, which represents the number of persons who transferred from the Canadian army to forces either in Britain or in the United States.

The navy, at the end of 1944, had enlisted 205 men and 21 women from the United States. Discharges totaled 70.

The money these thousands of American residents will receive from the Canadian Government in the form of discharge benefits is difficult to estimate, but it is undoubtedly well beyond \$25,000.

Veterans Minister Mackenzie said recently that of 16 benefits available to discharged servicemen who remain in Canada, those who settle in the United States would receive eight.

These included a clothing allowance of \$100, a rehabilitation grant of one month's pay and allowances, transportation home, the war service gratuity—as an example, an unmarried private with two years' overseas service would receive gratuity of \$925.50—vocational and educational training, disability pension, treatment for pensionable disability, insurance under the Veterans' Insurance Act.

## Fish Shipment

From Great Slave Lake Area For Eastern Markets

Initial shipment of fish from Great Slave Lake, authorized by Ottawa, this summer has arrived at Edmonton—100 tons in five refrigerated cars from Watrous. They had been carried 400 miles in cooler barges across Great Slave Lake and down the Slave and Athabasca rivers to the lakehead and then by rail to Edmonton. Eastern markets will get the bulk of the fish, mainly lake trout and whitefish.

Meinert Products Corp. holder of the fishing rights of the lake this year, had applied for a quota of two million pounds. The present 100-ton shipment accordingly represents about a tenth of the season's catch. —Financial Post.

## Here a CWAC There a CWAC

MEET A CWAC—

Meet a CWAC—meet yourself to think in terms of 35,200 eggs, 17,250 lbs. of meat, 600 lbs. of salt and 2312 lbs. of pepper, etc., as a month's supply you will have to handle. And Cpl. Edith Parry of the Main Supply Depot, No. 12 District Depot, Regina, Sask., when explaining the duties of supplying food to the Army, Cpl. Parry, whose home is at 247 Hetherington Ave., Winnipeg, Man., enlisted in the Canadian Women's Army Corps in October, 1942. At the completion of her basic training at Vermilion, Alberta, she attended a clerk's course at Edmonton, Alta. In February, 44, Cpl. Parry was posted to the Service Corps, No. 12 District Depot, Regina, and as more or less an experiment was sent to the Supply Depot at Airport No. 11 Service Flying Training School, Yorkton, Sask. "I was the only CWAC in the Supply Depot at that time," Cpl. Parry explained. "Since then more and more CWACs have been used for this type of work and have been found to be very satisfactory." In December, 44, she was posted to the Supply Depot at Regina and was promoted to her present rank in January, 45. In conducting a tour through the Supply Depot, Cpl. Parry drew attention to the fact that only the very best grade of food was used in feeding service personnel, and that all food was stored under the most sanitary conditions.

## CWAC "REPEATS"

Members of the Canadian Women's Army Corps are to arrive in Saskatoon recently from overseas and who have seen service in various theatres of war, including England, the Continent and the Mediterranean, were Sgt. Peggy Johnson, Glamis; Sgt. Mabel Bates, Porcupine Plains; Cpl. Edith Parry, Regina; Cpl. Edith Parry, Regina; Cpl. Dorothy Brock, France; Cpl. Pte. Marie Syme, Watrous. These army women were the first to return to Saskatchewan under the plan whereby members of the corps are repatriated after more than two years' service. Sgt. Bates, Cpl. Brock and Cpl. Marie Syme were the first draft to leave the provinces three years ago.

## THE WEARING OF CIVILES—

Now that the war is won, restrictions on the wearing of civilian clothes have been somewhat lifted. Sergeants and above may now wear civiles after duty. For personnel below the rank of sergeants it is left to the discretion of the Commanding Officer.

## BRITISHER JOINS CANADIAN WOMEN'S ARMY CORPS

One woman who has joined the Canadian Women's Army Corps overseas, "Peggie" Browne, was posted in Regina recently by her husband, Cpl. "Larry" Browne, to Saskatoon, a veteran who returned to Canada just two weeks before his wife. Pte. Browne of Cullin, Surrey, England, was married in November, 1942, and enlisted in London, August 1, 1941. "I wanted to know more about the Canadian and I believed the best way was to live with Canadian girls and then come to Canada," she explained. Like others in Britain she had heard that the Canadian women's army corps in Canada had "they didn't go down with her." One thing she had heard of often is the Red Cross and she looked forward to the day when she and her husband move to Vancouver. "The trip west had been one continuous thrill," Pte. Browne said happily. Pte. Browne met her husband in April, 1941. Both agreed it was "love at first sight." As a member of the C.W.A.C. she has been recently with the Royal Canadian Army Pay Corps in London. Pte. Browne was one of the eight members of the C.W.A.C. to arrive aboard a troop ship carrying 100 Canadian women to the ship "Neue Amsterdam."

## MEET A CWAC—

Sergeant (to Pte. Buttercup reporting in to her unit later) "I have to put you on the 'fat report'." Pte. Buttercup: But, please, Sergeant, I don't want to be fat!

## GEMTS OF THOUGHT

Prudence is a conformity to the laws of reason, truth, and decency, at all times and in all circumstances.

John Mason.

Those who, in the confidence of superior capacities or attainments, neglect the common maxims of life, should be reminded that nothing will supply the want of prudence.—Samuel Johnson.

The divine ruling gives prudence and energy; it banishes forever all rage, anxiety, evil thinking, evil speaking and acting; and mortal mind, thus purged, obtains peace and power outside of itself. Mary Baker Eddy.

The greatest good is prudence; a more precious thing even than philosophy, for it springs all the other virtues.—Epictetus.

Let prudence always attend your pleasure; it is the way to enjoy the sweets of them, and not be afraid of the consequences. Jeremy Collier.

Prudence is a quality incompatible with vice, and can never be effectively enlisted in its cause.—Burke.

Sperm whales when fully grown yield up to 145 barrels of oil.

## SOUND AT HEART

The other day an observer in England remarked, "The British came out of the war tired, cross and impoverished."

He was referring to the people of the British Isles. If he were doing his observing here he might use a current wise crack and say, "The Canadians came out of the war tired, cross, period."

Such an observation might be justified. Located far from the scene of battle, Canadian homes, factories, public services, remained intact throughout the war. Thus this country was able to satisfy the demands of a war-hungry machine. And in so doing, Canadian citizens earned money on a scale never equalled here before. Right now, in addition to holding several billion dollars worth of Victory Bonds, Canadian citizens have a total in savings banks accounts which is the highest in the history of Canada.

A critic might label us "cross and tired". But if he really knew us, he would not describe us as ungrateful or selfish.

Confirmation of our true national spirit will be forthcoming in the Ninth Victory Loan campaign which opens next Monday, October 22nd. To provide for the civil re-establishment of our men who fought and to provide at least a little of the goods which impoverished people across the Atlantic must have to survive, our people will buy bonds as enthusiastically in the Ninth campaign as they did in the previous eight Victory Loan campaigns.

## STRIKES MAY BE OUR DOWNFALL

Canada has gone through the war and emerged at the end of the conflict with a very slight rise in prices of most goods and commodities, and for this we must give credit to our leaders for their earnest and successful attempt to stop inflation.

Now that the war is over we are having a series of strikes and walk-outs that threatens to destroy all the good that has been accomplished. We have miners and meat packers in Western Canada out on strike. The miners want the abolishment of meat rationing. The packers want higher wages.

However, it is not an easy matter to satisfy everyone and if our government does abolish meat rationing we in Canada for the present will be more satisfied, but the meat hungry people of Europe will suffer because we won't be able to supply them with all the meat they desire to buy. Not being able to do this we are going to lose the European market in the long run, and then what is going to happen to the price of livestock—and the income of the farmer? And when the farmer can't get good prices for livestock he will cut down production and the packers will be out of work. With both farmers and packers with little or no revenue it can readily be seen what will happen to the market for coal in western Canada.

And who will gain by strikes and walk-outs, Canada must keep producing and keep her markets if she is to prosper. This is what our leaders are trying to do for us. They should have the support of everyone in the country in an endeavor to bring about the desired result.

CANADA STILL  
HAS A JOB  
TO DO

buy

## Victory Bonds

... more than ever before

Space Donated by The  
BREWING INDUSTRY OF ALBERTA

RED CROSS WORK COMMITTEE  
GROUPS MUST CONTINUE

In a letter from the Provincial Red Cross Headquarters it has been pointed out that the sewing and knitting being done by the various groups in the province is now more necessary than at any previous time, and the next six months must be devoted to the making and sending in as many articles as possible. This is the zero hour for goods to be made and sent in by all Red Cross work groups and it is to be hoped that the good work will continue throughout the present fall and winter months.

HAVE YOU BOUGHT YOUR  
SUPPLY OF COAL YET?

Now is a very good time to buy your coal for next winter. With cold weather not here some people may think that idea is rather foolish, but those who lay in their coal supply early may avoid a lot of inconvenience and trouble. Had very cold weather been experienced last winter there would have been wide spread suffering and hardship. Next winter may be a cold one and coal may be very scarce. Be sure and get your supply early.

## PAYMENTS FOR BARLEY

(By H. G. L. Strange)

The Government announces that the advance equalization payment to farmers, which hitherto has been 15 cents a bushel on all barleys, will be increased to 20 cents a bushel, but that the 3 cents premium, which farmers hitherto received who produced malting barley, will be paid into the equalization fund and given to all barley growers; this no doubt for the reason that feed barley at the moment is in as great demand as is malting barley. First to be noted is that the malting barley grower receives no less than he did before when he enjoyed the 5 cents premium, but that the man who produces feed barley receives for the moment as much as the farmer who produces malting barley. This condition certainly, I suggest, is only temporary. Those therefore who are producing malting barley should keep on with their good work, for next year conditions may be entirely different, and then malting barley will most probably receive a higher premium than is paid for feed barley; for it is commonly recognized that to produce malting barley costs more than to produce feed barley, and

## THE DEPARTMENT OF AGRICULTURE

Advises that because of drought, hail and frost

THERE WILL BE SHORTAGES OF SEED  
GRAIN AND FEED IN 1946

And farmers are urged to make provision immediately for their Seed Grain and Feed Requirements for the coming year.

There Will Be No Seed Grain  
or Feed Relief Issued.

## MUNICIPAL DISTRICT OF MOUNTAIN VIEW NO. 49

that much greater care must be exercised in harvesting and threshing malting barley than is necessary with feed barley.

## CANADIAN FARM FIGURES

The total of all farm land in Canada is 175 million acres of which

92,400,000 acres are improved land. Each year about 57 million acres of land are under crop in all of Canada, of which total 38 million acres or 67 per cent are under crop in the prairie provinces.

The total number of farmers in Canada is 732,715 and the total number in the prairie provinces is 296,441. Alberta has 99,716 farmers.

You Have  
TWICE AS LONG TO PAY

So many times you hear people say "I wish I could buy more Victory Bonds."

Well, it has been announced that there will be only one Victory Loan in the next 12 months.

People who buy Bonds now will have a whole year to pay for them.

You Can BUY  
TWICE AS MANY BONDS

Bear this in mind when the Victory Loan salesman calls on you.

The same rate of savings as in previous loans will pay for twice as many bonds over the 12-month period.

So, buy double this time.

## Sign Your Name FOR VICTORY

Farmers can buy Victory Bonds through any bank . . . on convenient deferred payments.

Victory Loan salesmen have copies of the letter at the right. (Banks also have copies.)

When you sign this letter . . . and pay 5% of the cost of the bonds . . . the bank buys the bonds for you. You have 12 months to pay for the bonds and the interest the bond earns pays the interest on the bank loan.

Mr. Manager, \_\_\_\_\_

DATE \_\_\_\_\_

Dear Sir:

I enclose application form governing the purchase of Victory Loan Bonds to which is attached cheque for an initial payment of \$ \_\_\_\_\_. (For value of 5% of bonds.)

I promise to pay you the balance of the purchase price plus accrued interest at 3% per annum within twelve months from the date of this letter.

Yours very truly,

## WHEAT BOARD APPOINTMENT

The personnel of the Canadian Wheat Bd. has undergone changes during the past week. Last Saturday Hon. J. A. MacKinnon, minister of trade and commerce, announced the appointment of W. C. McNamara as commissioner; also the appointment of H. G. Hunting as the position of assistant chief commissioner of the board in succession to Dan Kane who resigned recently due to ill health. W. C. McNamara who now joins the wheat board has been serving as Washington representative of the board. He was employed with the Saskatchewan Wheat Pool before going to the Wheat Board.

## THE HOME MARKET

The home market for food products one of vital importance to farmers. About two-thirds of the production of Canadian farms is consumed domestically. During the war years when the national income rose to about double the average of the pre-war years, food consumption mounted substantially. This would suggest that in order for an enlarged market for farm products full employment at good wages is necessary. On the other hand, it is equally true that to have a large market for manufactured products there should be good products for farm products.

## SHOES SAVED A LIFE

A well-known firm of United Kingdom shoe manufacturers has received an unusual testimony to the hardwearing qualities of its goods. The testimony comes from a Belgian who would a pair of golf shoes from them in 1941. Soon after, he was arrested by the Germans, he says. For twelve months he did hard labor building concrete roads, digging, and coal loading. Throughout the year he wore his golf shoes. At the end of 1942 he managed to escape because, "thanks to my shoes nobody could hear me when I started running". Determined to reach England he set out on a long march. He walked through France, over the Pyrenees and into Spain. That he did not lose his life on this formidable climb, he says, was due to toughness and nonslip qualities of his shoes. Eventually he reached

## COWS NEED SALT

Feeds generally used in dairy rations do not contain salt, and for that reason it must be added.

Salt is a mineral that can be self-fed without danger of over-feeding, but certain cows may not eat sufficient to take care of their requirement. A good practice is to add one lb. of salt to each 100 lbs. of the grain mixture. In that way you make sure that the heavy producing cows with the highest salt requirement will consume the most salt.

Even when salt is fed at this rate, additional amounts should be made available by allowing the cattle access to either a box of loose salt or to block salt.

## LETTER TO THE EDITOR

The Editor, Didsbury Pioneer.  
Didsbury, Alberta.

Dear Sir:  
As one of the supporters of the petition seeking to have our local domestic lighting rates reduced, may I beg the privilege of some space in your paper to reply to Mr. J.E. Liesemer's letter of last week. I think the efforts of "some of our good citizens" who went "rushing around with a petition" are not to

be dishonored; particularly, when one stops to consider that a large majority of the people signified their approval. It is not unusual in a well-regulated democracy for them to expect their wishes to be carried out. By the same token of reasoning the combined representation of the present Liberal party, with either the Conservatives or C.C.F. representatives, should be shifted to the opposition benches, with the proviso that the rest should rule.

An analysis of Mr. Liesemer's letter uncovers some shrewdly surmised statistics. Why doesn't he quote definite facts and figures to substantiate that the proposed rate is "perhaps" making "many times more out of the raise to the minimum users" throughout the province? Apparently, in the case of Didsbury, the Power Co. feel differently, for they stand to lose \$1,611.04 against an increased guarantee of \$393.42 based on their 1943-1944 operations. That's fair odds against any such suggested dire purpose throughout the province. How fortunate we are not in some of the other towns?

It requires little economic reasoning to figure why a pound of rice in Burma and a pound of the same commodity in Didsbury are at two different levels. Can he not, by the same equation, figure the cost of distribution to a congested city and a scattered country point? Employing this same reasoning we should be able to operate a street railway here and do as good a job as Calgary. Yet we should all pay

You think this  
is  
Dangerous?

● Casualties among steepclimbers are practically negligible—but accidents due to people riding on unsafe tires are all too common. Don't take chances. See us about your tires. Our experts will make necessary repairs promptly and efficiently.

**DOMINION**  
**ROYAL**

**ADSHEAD GARAGE**

COMPLETE TIRE SERVICE

A.E. FORD, prop. — PHONE: 58

the same minimum charge? Regarding rates for power consumed in this centre, does not Mr. Liesemer see that once the minimum charge is paid, that all rates quoted are higher than proposed here? Every sympathy should be extended to the poor and the people of inadequate pensions. No doubt by an inexpensive process of adjustment these people can utilize to full advantage the small difference in the power bill, and continue to enjoy the cheaper rates. In all fairness, joint consideration must be extended to the married class with dependents who are benefitting far in excess of the losses pensioners. It is ridiculous to make out that all this latter class are well off and can well afford the increased cost if rates remain unaltered. Thank you Mr. Editor for your attention to this letter.

# WORLD HAPPENINGS BRIEFLY TOLD

Sir Harry Lauder, celebrated Scottish singer, marked his 75th birthday by singing his favorite songs for scores of guests who visited him.

German submarines which have been touring British ports have so far netted 15,000 (about \$25,240) for charities.

Passenger helicopter planes will be used extensively throughout Scandinavia on feeder lines to Britain-Scandinavia Air Service, it was learned.

Congratulations were sent by the Air Ministry to the staff of Chelmsford gasworks which produced hydrogen for the entire London balloon barrage.

The German Embassy furniture, including the safe in which the Ambassador kept his private papers, was sold at public auction in Dublin on behalf of the United Nations.

A Lockheed Constellation transport plane set an endurance record for a non-stop flight record recently in eight hours and 30 minutes between Washington, D.C., and Burbank, Calif.

British ships have started to convert 10,000 tons of shipping from war to peacetime commercial standards and the job is expected to keep most ships busy until 1950.

Daniel agency broadcast from Japan said that Japanese purchasing goods from American soldiers or exchanging goods with them would be liable to death or 20 years imprisonment.

To help civilians paralyzed by an injury or wound to the spinal cord, war veterans have formed an association to be known as the Canadian Paraplegic Association. One of its aims will be to foster and encourage vocational and professional training of paraplegics.

## Opinion Of Scientist

Believes Atomic Bomb Should Not Have Been Dropped On Cities.

Prof. M. E. Oliphant, one of the pioneers in development of the atomic bomb, asserted that scientists who developed the weapon would not have used it as militarists and politicians did.

He predicted atomic energy would be used industrially within 10 years and that the nuclear energy eventually would replace all other forms.

He told a science club (Rotary) in Birmingham, England, he thought scientists were more horrified than anyone else when the bombs wrecked two Japanese cities.

Scientists believed this weapon could have been used against Japan very effectively without the use of a city as a target, said Prof. Oliphant, professor of physics at the University of Birmingham.

Intensive propaganda by wireless and leaflets would have warned the Japanese that one of these weapons would be dropped.

He said if this failed, the next step should have been to wipe out, for instance, one of the islands in Tokyo bay which were naval bases. He said a city should have been destroyed only as a last resort.

He said there was no defence against the bomb and described the idea that Great Britain and the United States, or any other country, could control the bomb by keeping the process secret as "just rot."

The atomic bomb had the equivalent explosive force of 20,000 tons of TNT. He was confident that before long bombs could be made with an explosive force of 1,000,000 tons of TNT, and subsequently of 10,000,000 tons of TNT.

Any industrial country could have the bomb in five years and any determined industrial country could have it in two. Control of the bomb could only be brought about by some sort of mutual agreement.

## Using Peach Fuzz

United States Firm Requires Large Quantity For New Product

Yen have heard about packing houses utilizing every bit of the pig but the squeal.

Now it seems that every bit of the pig, including the fuzz, is to be put to use.

L. A. Boyd, New Troy horticulturist and owner of the Michigan Fruit Growers, Inc., has received a letter from a firm of industrial research chemists, saying it is developing a product that requires large quantities of peach fuzz.

The chemists said that where large quantities of the fuzz could be purchased.

"I cannot estimate the fuzz available, but you would be surprised at the amount," Boyd says. "Seven or eight exchanges in this fruit belt operate peach defuzzing machines and send the day with a large supply."

## SHOCKING FIGURES

The Ottawa Journal says it is shocking to read that in Canada last year 311 children died of diphtheria, that cases and fatalities showed a marked increase over the two preceding years. It is shocking because immunization against diphtheria is harmless, effective, and everywhere available. Diphtheria could be made as rare as smallpox if we used against it the knowledge and means we possess.

**THESE NEVER DID MAKE THE GRADE**—Mean to Canadian servicemen in the Pacific, Bala fellows. Those jungle cut-throats never did make the grade. According to Canadian hairdressers, girl friends and wives aren't keen about those Burmese humps and spiral slicks they do. "Hollywood is still the big influence," one expert stated. "Soft, romantic waves—the glamour stuff—that's our stock in trade." Canadian girls are just a little conservative, another beautician said. "We haven't had one customer ask for native imitations." Casual hairdos, going under titles such as "beach slants," "romantic height" or "top lock curls," are most popular with the young set. Curls are strictly passe.

## Caused By Weather

Watch Repairers Say Thunderstorm Will Cause Main-Spring

If the main-spring in your watch is broken, the odds are two to one that a stray thunderstorm is to blame.

Leading jewellers in Columbus, Ohio, and watch repairers have aired their theory that main-springs break most frequently after a thunder-shower.

Robert C. Howard, a watch repairer for 38 years, says that the rapid change in climate and atmosphere after a thunderstorm caused the main-spring to contract and break. The same thing sometimes happens to a pocket watch which is removed from a warm pocket and left to stand uncovered in a cold room during a winter night.

Robert Smith, public relations director for the Battelle Memorial Institute at Columbus, says that although the institute has not conducted any experiments along this line, metallurgists agree that a change in temperature affects metals.

He adds that he found that upon opening a wrist watch on a cold window sill after it had been next to body temperature all day the watch usually stopped running but that the main-spring seldomly broke.

Clocks, however, escape the curious quirk of nature, jewellers say, because clocks have heavier main-springs than watches and are not affected by thunderstorms.

Another Columbus jeweller and watch repairer, Ruel Rhodes, explains that sometimes delayed reaction to the weather postpone breakage of a main-spring from one to ten days after a thunderstorm. He dismissed the widespread belief among laymen that main-springs usually are broken by being wound too tightly. He points out that most watches have safety devices which prevent excessive winding.

**Will Retain Food**

Britain Will Stop Sending Food To European Countries

Britain will stop sending food to hungry European countries after current shipments have been completed, food minister Sir Ben Smith revealed.

He reported that Britain has on hand or en route only sufficient food to supply her own people. Britain had reduced her stocks to a minimum to keep the promise she made last March to send supplies to liberated countries.

"We can only do it once," he said. He disclosed that Britain will receive the first shipment of bananas in five years only in 1946 from Jamaica. The first oranges to arrive here since V-J Day are due from South Africa, he said.

Smith reported that Britain receives one third of her meat from Argentina.

## Dream House

New Home In Toronto Requires No Dusting And Has No Furnace

A one-story "dream" home which requires no dusting and has no furnace is nearing completion on Dale avenue in Toronto's swank Rosedale district.

Built by Mr. and Mrs. C. F. Woods who tired of renting houses after 24 years of married life, the Lehigh residence combines "radiant" heating, dustless floors and a vacuum being to clean rooms at desired temperature. Principal heat is provided by iron pipes embedded in concrete floors.

To obviate dusting, the owners installed an electrical gadget known as the pre-pregator, which electrically charges the dust particles, so that they settle while another part of the device attracts the charged particles.

A forest area, burned over once only, grows again, but a double burning destroys all the seeds and makes replanting necessary.

India is two-thirds the size of the United States. 2640

## Practically Fireproof

High Octane Fuel Demonstrated In New York Office Building

A new high octane fuel is practically fireproof in the sense that it is slow to ignite in the open, reserves its release of power until injected into a motor cylinder. That a demonstration of its safety was made in a New York office building should be ample proof of its makers' belief in its ability to resist ordinary fire.

Until its temperature is raised to 100 degrees Fahrenheit the fuel does not give off the vapor required for ignition by flash fire or by a spark. That quality should add appreciably to the safety of flying, since it practically eliminates the danger of fire following the crash of a plane. Often it is true that even after there is a crash landing, but sometimes it is not.

That the fuel is to be fed by injection and vaporized by heat generated during its compression indicates that the motor built to use it will be a cross between the present conventional type and the Diesel. Do not expect it soon in the automobile.

—Cleveland Plain Dealer.

## Charred Stone

Great Arch Of House Of Commons In London To Be Rebuilt

Every charred stone of the great arch that leads into the old hilted House of Commons Chamber is being taken down and numbered carefully to be re-erected and incorporated in the new Chamber. Scattered and scorched as it is, the arch will be a memorial of the night of May 10, 1941, when the House of Commons burned, and in some measure to the courage of all the members of the House who stayed and carried on the Government of Britain in defiance of German bombers.

It is said that 500 different kinds of materials are used for manufacture of shoes.

## Time's Records

Those In Power Are Architects Of A Future World

Nations in a very real sense, are much like men. Each experiences birth, development, adulthood to a certain degree, and dissolution. Each has its entrance and its exit. What, in each case lies between the two extremes may be as varied as a chameleon's coloring. Only history can write the individual epitaph. So it was with the story that was Rome, the greatness that was Carthage. So it will be with Germany and that mistletoe land of the Rising Sun. So it may be with countries now seemingly arbiters of all on earth. What Time's records will tell depends largely on the unpredictability of the attitude of those in power and the use they make of their opportunities as architects of a future world.

Here and there a man is born seemingly fore-ordained to write his name in unfading characters on history's pages: a Cromwell, a Lincoln, a Churchill, a Roosevelt, even a Hirohito or a Hitler. The impact of their personalities works for great good or evil. But lesser folks also leave an impress on the "records of time." Each unit of a government, however small, may exert an influence that may be felt far beyond the confines of the land to which it owes its loyalties.

Each man of such a group has a share in shaping of plans and proposals while they are still plastic. In combination they form the trend that will mold the future. It is a thought not to be forgotten that this applies to all councils and legislatures including that now in session beneath the shelter of the Peace Tower that is Ottawa's pride—Ottawa, Canada.

**Need Is Desperate**

Canadians Asked To Make Sacrifices To Feed Starving Peoples

The need in Europe for fats and protein foods, such as meat, is desperate and the people cannot be re-armed with preparations such as vitamin pills. Dr. L. R. Pett, director of the nutrition division of the health and welfare department, said in an interview at Ottawa on his return from England.

"The people need food, and everything that Canada can do to supply it is more than justified, no matter at what inconvenience," he said. "Even in England, this winter promises to be as grim from a food standpoint as any during the war."

**Canadian Was First**

Raised Union Jack In Singapore Three Days Before Occupation

The first man to raise the Union Jack in Singapore after the end of the war in the Pacific, was Lt.-Col. A. R. Stewart of Vancouver.

Col. Stewart, a paratrooper who had been operating in China, Burma and Malaya in the last 1½ years, parachuted into Singapore three days before its occupation by British forces. He commanded a car from a Japanese general and to the cheers of Chinese spectators, he riged the Union Jack on a flagpole.

The Hindu plant sweet basil outside their temples and homes to insure happiness.

**DEFEAT IS BITTER** From the expression on his face, it really hurt this Canadian soldier to see the surrender of Yawaka naval base.

## Must Be Proved

World Should Know For Sure That Hitler Is Dead

There must be no cessation in the search for proof that Adolf Hitler is dead. First and foremost, the world must be satisfied that he is not hiding somewhere, to pop out at some opportune moment and try to rally the forces of aggression around him. There is, however, another danger that is almost more serious.

Unless proof of his death can be secured, the way will be open for impostors to trade on his influence. There would be nothing to prevent some ambitious little maniac, a few years hence, growing a funny moustache and suddenly appearing, claiming to be the Fuhrer. That would bring Hitler to life in a very real way, for there would be thousands gullible enough to follow such a pretender—Wunder star.

**NO USE FOR ONE**

Grover Cleveland Wilsholtz, of El Paso, Tex., recently notified us that the examining officer at a nearby army base asked a new man what his wife's name was. The fellow said he doesn't know. "What do you mean?" demanded the officer. "What did you call her?" And the new guy said: "Never had to. She was always there."

In the early 17th century it often took two years to make the round trip from Europe to China.

## VALUE OF IMMUNIZING AGENTS

Deaths in Canada in 1944 from diphtheria, whooping cough and scarlet fever totalled 758, it is revealed in figures supplied by the Dominion Bureau of Statistics.

This was lower than the 1943 death toll of 803, but still far too high for this day and age when there are available effective immunizing agents against these diseases.

Immunization against diphtheria can be obtained through use of harmless but effective toxoid. Whooping cough vaccine provides protection in more than 80% of those treated and, in cases where the disease occurs after vaccine, the same result cannot be accomplished with diphtheria toxoid, but it gives 80% protection.

Immunization through vaccination has practically wiped out smallpox in Canada so there appears to be no reason why the same result cannot be accomplished with diphtheria, whooping cough and scarlet fever.

But, while smallpox is practically extinct, there is still need of vaccination to make sure it remains in that state. There is no natural immunity against smallpox. Vaccination is the only protection.

To draw attention to the fact that every Canadian child should be and can be protected against diphtheria, whooping cough, scarlet fever, and smallpox, The Health League of Canada, in co-operation with health departments, has inaugurated National Immunization Week.

It will be the third such annual observance promoted by the Health League in an effort to give added emphasis to the year-round immunization programs of the League and the health departments.

## Free Lessons

Canadian Troops Are Learning To Speak Conversational German

Canadian army troops stationed in Oldenburg, Germany, are now receiving free lessons in conversational German from a teacher experienced in teaching English to Germans.

Under arrangements with the Canadian Y.M.C.A. in Oldenburg, classes are conducted two evenings weekly with Horst Magel, former inmate of a Nazi concentration camp, teaching. Magel and his wife are the sole surviving members of his family, all other relatives having disappeared during the German occupation of Poland.

## OUR COMPLETE SHORT STORY—

# GIRL FROM RANGOON

By ROSS BARKEY

McClure Newspaper Syndicate

Pete was stewed—ingratiatingly and indignantly stewed. His expression was that of a dead habit, and his careful progress resembled the still, languid gait of a mechanical man. He simply followed the direction of his toes—which led him unerringly to Babe.

Babe was, in every respect, the biggest thing in Pete's life. She stood fully eight feet to the shoulder and tipped the scales at upward of five tons—indications of very comely measurements, indeed, in a lady pachyderm. And the devotion of these two friends was a beautiful thing.

As Pete—squat, swart and unlovely—made his labored way through the circus camp, the instinct alone remained. Walk—till you've worked this off... or you'll wake up to find you aren't even an elephant's nuremaid any longer!

But Pete craved companionship. He would annex Babe and compel her to stroll with him in the still of the night.

No doubt it was disconcerting to Babe to be rudely awakened at a time when all good elephants are asleep. Possibly she had been dreaming of her childhood days in India, where she'd roamed the jungle, a major member of a noble harem, ruled over and guarded by a mighty sire. But she blinked her little eyes and followed Pete unpettingly, somewhat annoyed, perhaps, by the order of his cheap cigar.

She must have guessed that something was wrong. There was no bustling activity such as attends the breaking up of a circus camp, no bare of hand to herald a parade, in which Babe would pursue her lumbering pace, holding coyly to the tail of the elephant ahead. Did her keen intelligence hint to her that this per-

son leading her away into the night was Pete, and yet, in some mysterious way, not Pete at all? How was the gentle, philosophical Babe to guess that the particular brand of firewater Pete had imbibed had drugged in him the devil, and brought into being the villainous Mr. Hyde?

As they moved ponderously into the night, Babe undulated her prehensile trunk and rested it caressingly upon Peter's shoulder, touching his cheek lightly with the delicate, finger-like tabs at the end. As the fumes of his breath reached her—effused and unfamiliar, Babe halted in her tracks.

Pete, in no need to brook opposition from so inferior a creature as an elephant, turned and showed her with thick-tongued abuse, tugging viciously at the big ear just within his reach. Still, Babe refused to budge. And her continued resistance drove Pete, in his truculent frame of mind, into a frenzy.

Ordinarily he would have better judgment than to trifle with the dignity of a full-grown elephant, however gentle. But Pete was filled with the stuff that inspires the mouse to beat upon its breast and cry: "Bring on your cat!" Doubling up his honey nut he deliberately hung one on the only Niblick which spilt in the lowered head—the space between the eyes.

Babe backed away, whistling with surprise and displeasure.

A normal man would have realized that Pete's next move was practically the equivalent of writing his own epitaph. But Pete, now free from the spell of the Hyde complex, removing the cigar from his mouth he pressed the glowing end against Babe's sensitive trunk.

With a squeal of pain and rage, Babe's gentleness left her. She trumpeted a protest. It was Pete's good fortune, then, that Babe was not a member of the herd African species, with the huge fanlike ears and cruel ivory bayonets. Babe was a girl from Rangoon, and her tusks, such as they were, had been removed.

Babe had never been a mother, but somewhere in the massive brain there lurked, apparently, a memory of the sort of punishment visited by mother elephants upon their rebellious offspring. Calling her mobile trunk, she released it like a spring, delivering what probably seemed to her little more than a love tap, but which sent Pete sprawling and gasping, heading in the sand. And Babe's slow eye slowly moved.

With his last remaining ounce of strength Pete rolled over on his back and lay in the eerie light of the approaching dawn, his eyes closed, his angry little eyes breathing, no doubt, his own particular version of "No I Lay Me." But his punishment was not complete. Grappling with those fingerlike tabs the burning cigar from where it had fallen, Babe pressed the fiery tip against the cheek of the unhappy Pete.

Scrambling and writhing, but now sober, Pete felt himself being lifted in the coil of that terrible trunk. At the memory of a similar occurrence he had once witnessed, Pete panted, out cold.

Babe seemed to realize at once that the hateful stranger who had treated her so indignantly had now left her friend's body. With this knowledge her rage vanished. True enough, Pete seemed to have gone temporarily "nuts," but that was all over now. Moreover, he appeared to be ailing, and was possibly in pain.

Elephants are known to be very sympathetic. Babe had had her own miseries from time to time—and she knew what to do. Singing Pete's limp body aloft in the coil of her trunk, she tenderly bore her poor, sick keeper straight to the circus vet.

## Important Discovery

Plastic Being Used In Production Under New Name

One of the United Kingdom's war discoveries was Plasticase—an unbreakable, flexible, transparent, glasslike material used in the manufacture of bomber windcreens. This new material will now be applied to peace-time production under the name of "Perplex." Already manifold household goods are being produced from this material, including complete bathrooms, electrical and kitchen equipment, picture frames and even furniture. Instead of corrugated iron, Perspex sheets may now be used for roofs, skylights, tops and wireless casings are also being made out of this attractive material.

## FIRST CASUALTY

The first reported injury of an American soldier since occupation of the southern Korea was reported when it was disclosed a sentry suffered the loss of four fingers when he opened a bamboo-trapped fountain pen in the governor-general's palace at Seoul.

## RELIEVES MISERIES OF Baby's Cold As He Sleeps

Penetrates / Stimulates  
deeps into bronchial tubes with its soothing, warming vapors.

Warnings: soothing relief—grand relief—comes when you rub good old Vicks VapoRub on the throat, chest and back at bedtime. Its penetrating-stimulating action keeps on working for hours. Invites restful sleep. And often by morning most misery of the cold is gone. No wonder most mothers use VapoRub. Try it tonight! home-proved VICKS VAPORUB

## SMILE AWHILE

"The genuine ivory carvings you sold me last week turned out to be imitation."

"I can't understand it—unless the elephant had a false tooth."

Husband: "What extravagant! You have two hats to match that one dress."

Wife: "Oh, no, I haven't. I've only one dress to match the two hats."

Tommy: "My teacher's got the worst memory in the world."

Father: "So he forgets everything, does he?"

Tommy: "No, he remembers everything."

"Lost your job as a caddy?" asked one boy.

"Yes," replied the other, "I could do the work all right, but I couldn't learn not to laugh."

"You want to wed my daughter? My answer depends on your financial condition."

"What a coincidence! My financial condition depends upon your answer!"

"He thinks the Henry VIII, doctor. Is that serious?"

"Not unless he thinks you're Ann Boleyn."

First Wife: "Is your husband a book worm?"

Second: "No, just an ordinary one."

Teacher: "Lot was warned to take his wife and daughter and flee out of the city. Lot and his wife and daughter got safely away."

Student: "What happened to the flea, man?"

Teacher: "Now, Tommy, tell me where elephants are found?"

Tommy: "Elephants are such very large animals they hardly ever get lost."

First Workman: "Where is Bill today?"

Second Workman: "In 'ospital."

First Workman: "Not 'appened?"

Second Workman: "E came down a ladder ten minutes after he was taken away."

He: "See that big substitute ballplayer down there on the bench? I am sure he'll turn out to be our best man."

Sher: "Why, you darling! Isn't this rather sudden?"

## A FREAK ACCIDENT

A man in St. Helen's Lancashire, getting out of his car to investigate a suspected fault, was hit and knocked down by the rear wheel which had fallen off and spun along behind.

## "THE LONG, HARD WAY BACK"

—Bishop of the St. Louis Star-Times.

traded with self-will, is a brick in the new structure of new families and a better world.

◆ What about our woman in the post-war world? The Midland, Ont., Free Press took a survey and found that majority do not want to be career women. Single women when they get married want to keep house, and give up their jobs; married during the war, some wanted to keep working awhile for a stake. A few believed if there were no children in the home, it was better to keep on working. The consensus of opinion among engaged girls was that they would quit work at once when married. One cynical girl intended to keep on working and make "lots of money," as marriage didn't appeal to her. Many realized their positions in the working world was precarious, with veterans returning, but intend to keep it as long as they can.

◆ Waiting for an income tax refund is like waiting for death. You know it will come, but you get awful grey waiting.—Picton, N.S., Advocate.

## Giant Warships

New United States Warships Too Big For Panama Canal

The United States Navy's new 15,000-ton aircraft carriers, biggest warships afloat, are too hefty to pass through the Panama Canal. In order to reach the Pacific they must round Cape Horn or sail east.

Confirming this fact, naval sources said it is not a case of a man building a boat in his basement too big to take through the door. It is simply recognition that the canal, as a controlling factor in naval construction, is outmoded.

The three behemoths are the Midway, already commissioned; the Franklin D. Roosevelt, launched but not commissioned; and the Coral Sea, still under construction.

Supplemental looks, begun before the war but not completed, will eventually permit the carriers to get through the canal.

## Counter Weapons

Produce Projectiles Capable Of Destroying Planes Or Rockets

The London Daily Express said that British and United States scientists have developed counter-weapons to the atomic bomb which are in advanced stages of development.

Chapman Pincher, the paper's science writer, reported that the principles of British radar, German rockets and American fuses were being combined to produce projectiles capable of destroying planes or rockets carrying atom bombs while they are at great height. He said the new defence weapon also would destroy the mechanism of the atomic rockets or bombs before they exploded in mid-air.

## SELECTED RECIPES

### PEARS ARE PLEASING

At this season one need look no further than the nearest fruit market for inspiration in planning meals that will please the family. These quantities of rosy-headed pears meet the eye and immediately the housewife can think of several ways in which this popular fruit may be served. For breakfast, pears baked or sliced raw over the crisp morning cereal is a treat. For luncheon, fresh pears stuffed or coated with cream and Requefort cheese mixture and served with a few simple accompaniments, contribute to a smart menu for the club group. For the dinner cocktail, fully fresh pears and balls of melted butter, the gourmet's talking. There is the simple matter of covering stewed chilled pears halves with thick cream or thin custard. A slight variation of this same theme is Crusted Pears in which the bland quality of the pears combines to advantage with crisp cereal and with very little sugar. You'll like pears better than ever prepared this way.

### CRUSTED PEARS

3 fresh pears  
1 tablespoon lemon juice  
1/2 cup honey  
1 1/2 cups oven-popped rice cereal  
1 tablespoon butter  
1 teaspoon nutmeg

Pare fruit and cut in half lengthwise; remove core. Dip halves in mixture of lemon juice and honey. Roll in cereal which has been crushed into fine crumbs. Place in greased baking dish, cut side up. Dot with butter and sprinkle with nutmeg. Bake in moderately hot oven (400 deg. F.) about 25 to 30 minutes or until tender. Serve pears hot or cold with Custard Sauce. Yield: 6 servings.

Forest fire sometimes travels faster than deer can run. Times 2640

**PRIZE STUDENT**—John Hanson, son of L. M. Flett, C.P.R. agent at Neudorf, Sask., has been awarded one of two scholarships provided annually by the Canadian Pacific Railway to its employees under 21 years, or minor sons and daughters of its employees, carrying up to five years' tuition at McGill, Montreal. The Neudorf student attended public schools at Fort William, Ont., Kelso and Neudorf, Man., and high schools at Neudorf, Kelso, Kelso and Neudorf, and recently completed a six-week summer course at Saskatoon. He averaged better than 85 per cent. in Grade 12 exams, and is enrolled for engineering at McGill.

## Military Training

Says It Should Be Placed On A Voluntary Basis

Dr. Sidney Smith, president of the University of Toronto, said representatives of five universities—McGill, Queen's, McMaster, Western and Toronto—met here Sept. 8 and decided to recommend to their governing bodies that participation in any military training program be placed on a voluntary basis. Military training has been compulsory in Canadian universities since 1941 under the Resources Mobilization Act.

## This Week's Pattern

By ANNE ADAMS

Can't begin to sing the praises of this lovely, slenderizing frock! Pattern 4934. Princess-line panels may contrast or match; are easy to sew and fit. Leaves are embroidered.

## LOCALS

—K. Roy McLean, Optometrist, will make his next visit to Didsbury at the Rosbud Hotel, on Monday morning, November 5th. Wednesday to Saturday consult at 125 Southern Bldg., Calgary. 2t

Word has been received that Cpl. Milford Cressman has left Gander, Newfoundland, where he has been stationed, and expects to get his discharge at Moncton, N.B., before returning to Didsbury.

Mrs. John Hislop writes from California that they have moved to Riverside, California, where her husband is on the faculty of the Riverside College. He was a former Midland & Pacific grain buyer at Didsbury. Mrs. Hislop also states that her mother, Mrs. E. Pearson, who has been visiting with her for the past three months, expects to return to Didsbury soon.

Mr. and Mrs. C. Hipple of Calgary spent the week-end with Mr. and Mrs. E.T. Wiggins.

The fire bell rang Sunday evening but fortunately there was no need for action by the local brigade. A slipping belt at the Pool Elevator caused smoke, but no fire resulted.

Mr. and Mrs. N.W. Reynolds left Friday after visiting for the past month with Mrs. Reynolds' parents Mr. and Mrs. Dave Edwards.

The Misses Beatrice and Elden Downey of Carstairs were Didsbury visitors Saturday.

Mr. J.H. Hall of Calgary spent last Wednesday and Thursday in town.

Miss Margaret Crockett, R.N., who was at the local Health Unit for a couple of weeks, has been appointed as stewardess with the Trans Canada Airlines.

Miss Ruth Hooper, recently discharged from the Canadian Army Medical Corps, has received a Mention in Despatches Award. Miss Hooper was surgical supervisor at No. 3 Cdn. Casualty Clearing Station Overseas. She is now employed at the Didsbury Hospital.—Oids Gazette.

E. G. Ranton left Tuesday to spend a couple of days at Edmonton.

Mr. A. Janzen of Herbert, Sask., visited with his son, Pete Janzen, and family, and with other relatives in the district this week.

Mrs. Ada Stevens has rented her home town to the local boys' Raemen, who came from Ontario.

Arthur Pedersen, recently discharged from the RCAF, has accepted a position with Cassidy Lumber Yards.

—The Cassidy Lumber Yard now has a stock of Fir Veneer on hand. Get it now for inside and outside work, and cabinet material.

Mrs. Orville Gilmore had a dinner party Sunday on the occasion of her birthday.

Mrs. William Shannon holds top record so far for the size of potatoes reported grown in the Didsbury district, with a potato weighing 3 lbs., 1 oz.

Mrs. David Cassill arrived last week from Toronto, and is the guest of Dr. and Mrs. W. G. Evans.

## TOWN OF DIDSBURY NOTICE

The Town Books will be closed for the allowance of discount of 5% on current taxes, at 12 noon on Wednesday, October 31st.

Due to the change over in the office of Secretary, Ratepayers are respectfully requested to pay their taxes as soon as convenient and if possible before the 31st inst.

The retiring Secretary expresses his appreciation of the co-operation of ratepayers over a long period of years and bespeaks for his successor the same kindly consideration.

W. A. AUTSIN,  
Sec. Treas.

## FOR SALE BY TENDER

Sealed Tenders will be received by the undersigned up until Saturday, November 10th, 1945, for the purchase of the Atkins one-roomed School, built on the 31st inst., located on the old Atkins school site in the S½ of Sec. 4, Twp. 30, Rge. 4, West of the 5th Mer.

Purchaser to move buildings from the school grounds.

Tenders to be submitted for each building separately. Highest or any tender not necessarily accepted.

S. J. GILSON, Sec. Treas.  
Olds School Division No. 31,  
Didsbury, Alberta

Mr. and Mrs. O. Gilmore and Mr. A. Alcock and daughters Phyllis and Shirley were recent visitors with Mr. and Mrs. Geo. Innes.

LAW Elizabeth Austin of the WD R.C.A.F. arrived in Calgary Saturday from overseas, making the trip by hospital ship and train. Mr. and Mrs. Austin went to the City to meet their daughter, and they all returned to Didsbury Monday. Elizabeth is at present out on 28-day sick leave.

Ernie Wilkins reports that the new Koffee Kounter is doing a good business. This restaurant was formerly the Imperial Cafe, which the new owners have purchased and renovated into a modern eating establishment.

Miss Doris Fawcett leaves this week end for High River where she has been transferred by the Alberta Government Telephones. Jim Calhoun was over to the Pastor district last week on a "wild goose chase" but he came home with a fine big Canada goose, so his outing was not altogether a total failure.

Flying Officer K.A.C. McNair of Didsbury has been awarded the Distinguished Flying Cross, according to word received by his father, T. McNair, who resides south west of town. "Scotty" has now returned to Didsbury and we are proud to welcome him home.

A light rain fell for awhile Tuesday night, but the weather has cleared off and the fine days are continuing. Threshing is going on steadily but there is still a lot of grain to thresh, particularly west of town.

Abe Neufeld has about completed a small addition to Mrs. F. Finlay's bungalow in town. He has been engaged to put an addition to the editor's house and we hope the work is commenced soon.

There are a number of boys returning from overseas and the "Pioneer" would be glad if relatives would report their arrival in town. We have no other way of getting this news and friends are always glad to learn that the boys are back.

## EXPANSION OF HUDSON'S BAY

Sir Patrick Acheson, Governor General of the Hudson's Bay Company, arrived in Edmonton on September 29th, in the course of a survey of general conditions throughout the dominion. After a stay of two or three days he will leave for the Pacific Coast to continue his duties. In an address given at Edmonton, he stated that a very extensive programme of modernization of the company's stores will be carried out as soon as materials and man-power become available. No improvements had of course been possible during the war years, which has emphasized the necessity of their being put into effect now as quickly as conditions will permit.

## CARD OF THANKS

The Didsbury Hospital wishes to acknowledge with thanks the \$6 donation from the Lutheran Ladies Aid, and the donation of vegetables from the Ruy and Westcott United Churches.

## CARD OF THANKS

We wish to thank our friends and neighbors for their kind expressions of sympathy and floral tributes at the time of our recent bereavement.

MRS. KIEVIT &amp; FAMILY

## NOTICE

The Hospital Board would appreciate it if anyone having surplus vegetables to dispose of would get in touch with Miss Carter, the Matron at the hospital.

## TENDERS

The Didsbury Municipal Hospital Board will accept tenders on the purchase of one Circulating Coal Heater, formerly used in the Nurses Home, and One Wagon and Water Tank, complete. Tenders to be in the hands of the undersigned not later than October 31st, 1945.

For further particulars apply to the undersigned.  
H. LYNCH-STANTON,  
Secretary

## CLEAN UP NOTICE

All residents are requested by the sanitation department of the Town of Didsbury to co-operate by burning all garden refuse, tree trimmings, etc. It is impossible for the local garbage collector to remove all this refuse and the only alternative is to burn it.

## EVANGELICAL CHURCH NOTES

"Men of Honest Report" will be the theme on Sunday, October 21st at 10:30 a.m. Sunday school will be held at 11:30 a.m., and at 2:00 p.m. Church service at 4:00 p.m. Prayers will be at 3 p.m. There will be no evening service because of the church dedication at Beiseker when Bishop E.W. Prastorius will preach and dedicate the church.

HUGHIE ROBERTS  
Phone 107, Didsbury

ALL SIGNS POINT TO AN OPEN FALL

Following the September snow storm we have had two weeks of ideal Indian Summer weather with the temperature rising to above the 80 degree mark the first of the week, and all signs point to an open fall and a continuance of these summer days. Not that we won't have intermittent snow flurries and rain, because anything can happen to Alberta weather and politics—and the changes are often sudden.

However, if the migration of our game birds has anything to do with weather forecasts, the signs are all in our favor.

The flight of Sand Hill Cranes has not come down from the north yet, although these birds are usually down in hundreds of thousands by the middle of September. The same is true of the migration of Canada geese. Reports are to the effect that there is a large increase in the same bird population in the far north this year, but they are not down yet in their regular haunts. So, after all, maybe there is some hope for Didsbury district farmers of getting their threshing done before the winter sets in. But the weather is unpredictable, so don't count on these fine days continuing till Christmas.

Since the discovery of radium at Eldorado in northwest Canada in the early 1930's, the price of a gram of radium has decreased from about \$100,000 to \$30,000.

Canada's 1945 wheat crop is placed at 321,409,000 bushels. This is 114,000,000 bushels less than in 1944.
